

Dismantling joints with bellow in stainless steel, flanged PN 16

Art. 20081

Flanges: UNI EN 1092-2 PN 16

Installation: horizontal

APPLICATIONS • Water supply • Industry • Irrigation •
Pumping stations

The dismantling joints are used in order to mount and dismantle valves from the pipeline. The bellow allows the compression of the joints, facilitating installation or dismantling procedures, compensating axial movements of the pipe. The joint must be compressed before installation. The bellow dismantling joints can be installed above or underground, in chambers and generally speaking in plants during operations. The bellow is made in stainless steel AISI 304/321, tie rods and bolts are in stainless steel AISI 304, flanges in galvanized steel or epoxy coated. Connection stud bolts are not included.

Materials

bellow	ASTM A240 Tp 321
sleeve	ASTM A240 Tp 304
flanges	Q235JR
tie rods	stainless steel AISI 304
